*New
Beauty*

To the Wahl Dealer

IT is with a feeling of pride that we present to you the 1925 line of Wahl Products—New Perfected Wahl Eversharps, Wahl Pens and Red Top Eversharp leads. On the pages of this book is illustrated not only the most complete, but the finest line of high grade writing instruments we have yet produced.

The introduction, this year, of the New Perfected Wahl Eversharp marks a distinct epoch in the history of writing implement progress. It has been placed on the market only after years of scientific research and experimentation on the part of our engineering staff. It is really the "trouble proof" pencil.

Six new features, added refinements, make the New Wahl Eversharp the finest pencil made. It is not only easier and faster in operation, but is free from any tendency to clogging or faulty operation of any kind. So strong is our confidence in this new pencil that we print the following broad guarantee in our national advertising:—

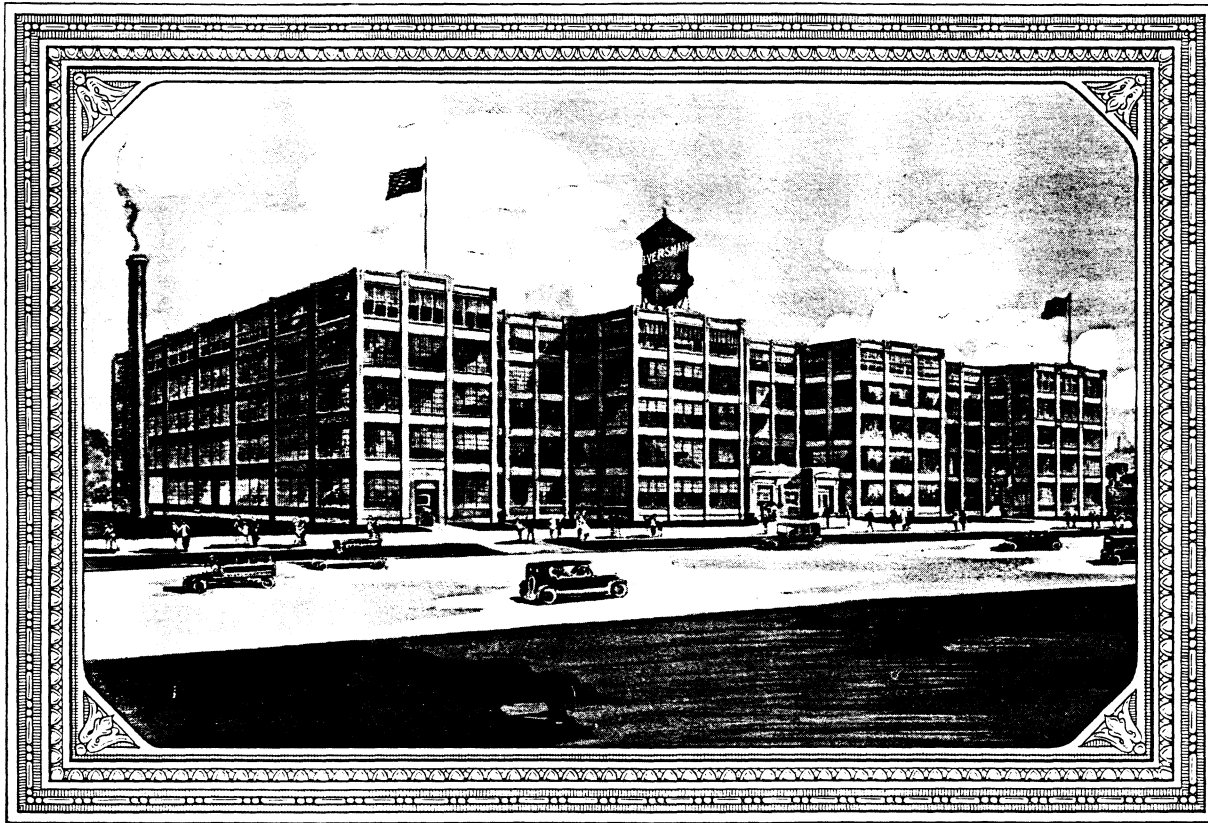

"The New Perfected Eversharp is unconditionally guaranteed against faulty operation of any kind, from any cause. All dealers are authorized to replace free of charge any part that fails to work to your entire satisfaction."

Eversharp's "write-hand companion," Wahl Pen, is becoming more popular with the public every day. The fountain pen user recognizes quickly the superiority of this fine line of pens. The increase in volume of our metal pen business is particularly gratifying. People everywhere are realizing the logic and good sense behind the idea of gold or silver for pen barrels. The Wahl all-metal pen combines beauty, utility and indestructibility in high degree.

You are urged to study the pages of this book carefully and familiarize yourself with the wide range of styles and sizes of Wahl Products which you are able to offer your trade. By so doing you can give expert advice to your customers in the selection of the items best suited to the desire and needs of the individual.

We are grateful to each of our dealer-friends for the co-operation which has made the present development of this business possible, and to assure each one of our loyal support and service.

THE WAHL COMPANY.

The Home of Wahl Pens and Eversharp Pencils

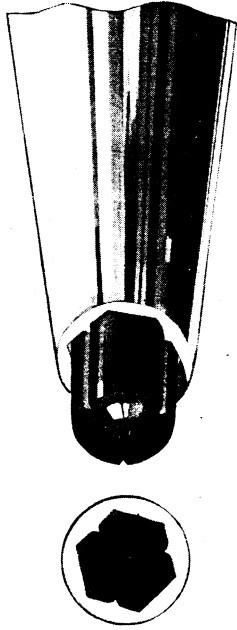

THIS spacious daylight factory is devoted exclusively to the manufacture of Wahl Eversharp pencils, Wahl Pens and Eversharp leads.

It is a thoroughly modern fireproof building, five stories high, with seven acres of floor space. The first four floors are occupied by the manufacturing departments, and the fifth floor houses the executive, sales and general offices.

All the equipment in the Wahl plant is the finest that human ingenuity has ever devised for building quality writing instruments. Raw materials of the highest grade are here fashioned with skill and care into finished Wahl Products—the world's leading writing tools. Even the precious metal parts used in making Wahl Pens and Eversharps are made here in our own tubing plant—Eversharp leads, too, are made in this building.

This factory has a daily capacity of 50,000 pencils, 8,000 pens and 1,300,000 sticks of lead.

The entire resources of this large, substantial organization are behind every Wahl Product you sell.

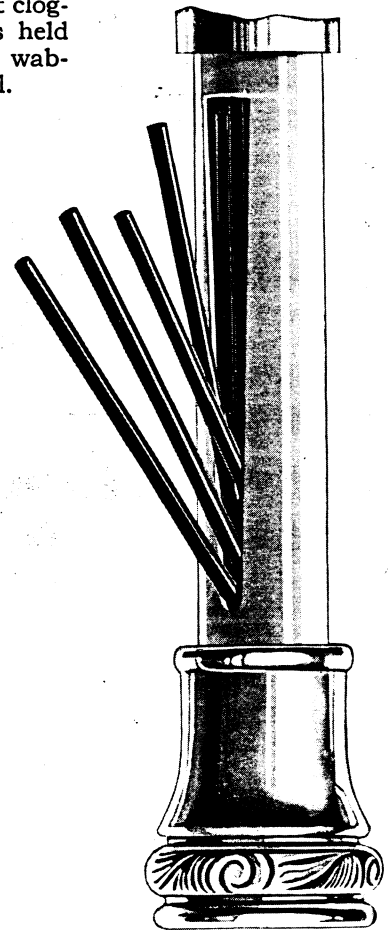

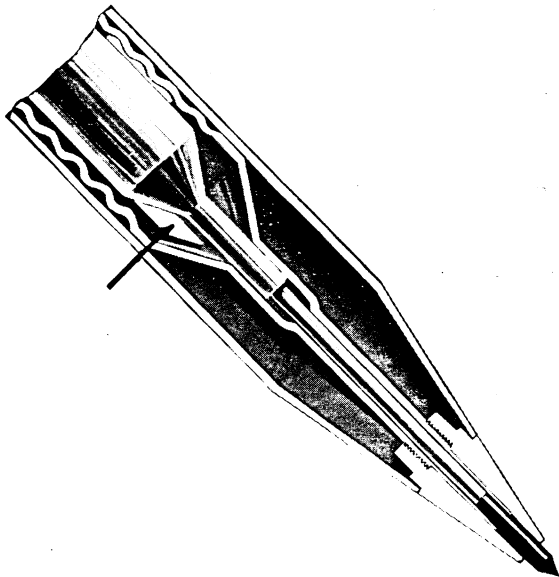

Perfected Wahl Ever- sharp Features

The Rifled Tip Perfected

EVERSHARP'S rifled tip, the patented invention which first made a good mechanical pencil possible, has now been perfected! Tiny relief spaces between the lead-gripping teeth positively prevent clogging or jamming. Still the lead is held firmly at the point; no slipping; no wobbling; no breaking inside the pencil.

Extra Leads Accessible Immediately

THE new side-opening lead magazine enables the user to draw a new lead almost instantly. The amount of reserve lead can always be seen. This feature gives new convenience and new speed of operation to Eversharp.

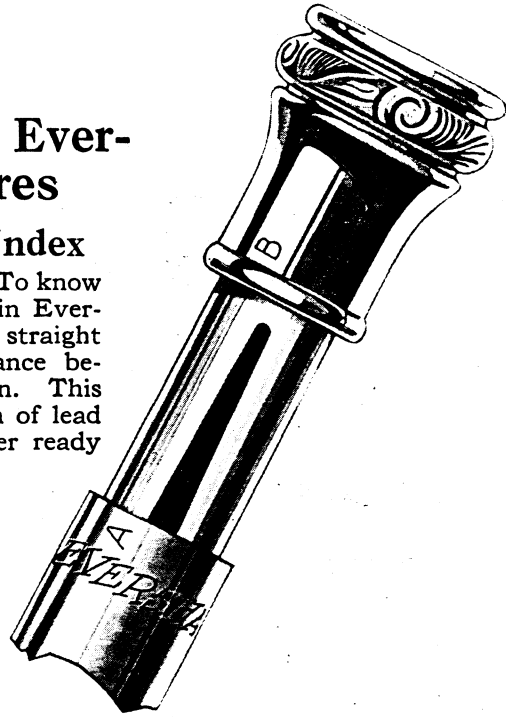

Loads in an Instant

THE drawing at the left shows the trigger which releases plunger when lead is used up. One pull—insert lead—one push—a turn. That's all. Reloading requires only a very few seconds.

Perfected Wahl Ever- sharp Features

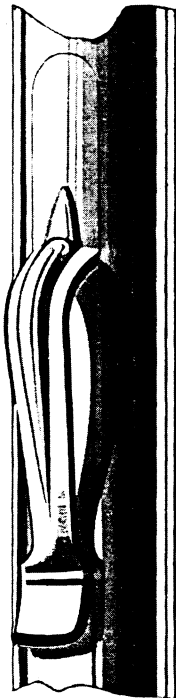

Automatic Lead Index

A very useful feature. To know the length of lead in Ever-sharp just pull the cap straight out and notice the distance between A and B, as shown. This distance equals the length of lead remaining in feed chamber ready for use.

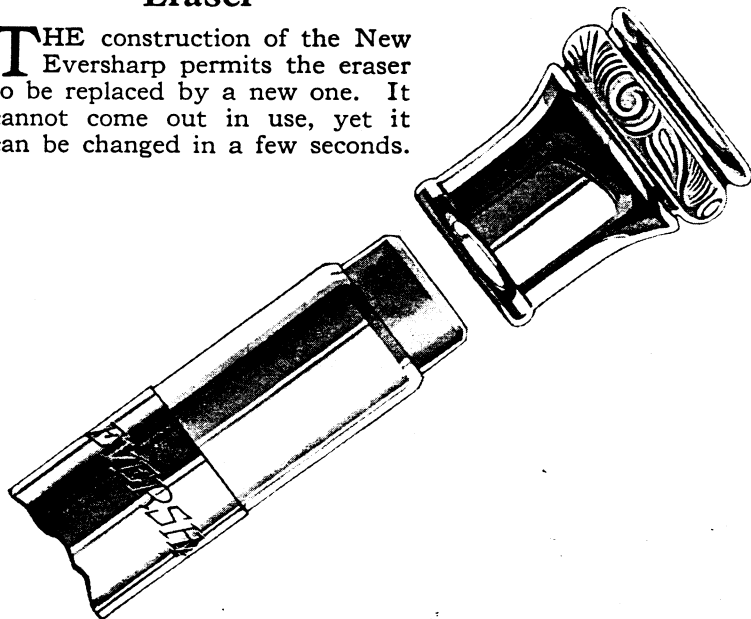

Stronger, Better Clip

THE pocket clip on the New Eversharp is made stronger by a different construction which adds to its appearance. Even if accident break the clip, a new one can be inserted in a few moments.

Replace Worn-out Eraser

THE construction of the New Eversharp permits the eraser to be replaced by a new one. It cannot come out in use, yet it can be changed in a few seconds.

Every Part Replaceable

THE New Perfected Wahl Ever-sharp can be completely taken apart by unscrewing the tip and pulling out the mechanism. All parts are interchangeable and replaceable. Anyone can replace any part in a few seconds.

ENAMELED CHECKING PENCILS

Telegraph
Word

Eahbr No. 101

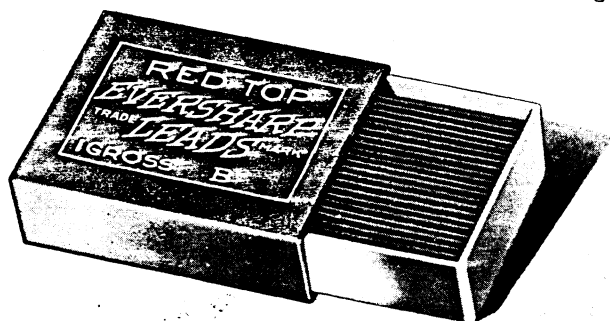

Handsomely enameled checking pencil, equipped with an extra box of 6 large size checking leads in any of the following colors: Black, red, blue, yellow or green. Barrel of pencil is enameled in the same color as the leads with which pencil is equipped. Be sure to give color assortment desired when ordering. Length $5\frac{1}{4}$ inches.

RED TOP EVERSHARP LEADS

Eversharp leads are made of the highest grade of domestic and imported graphites, clays and waxes and are guaranteed to write easily and smoothly. They are the finest leads obtainable, both for strength and writing quality and should always be used in Eversharp Pencils.

Made in the following grades and colors (standard Eversharp diameter):

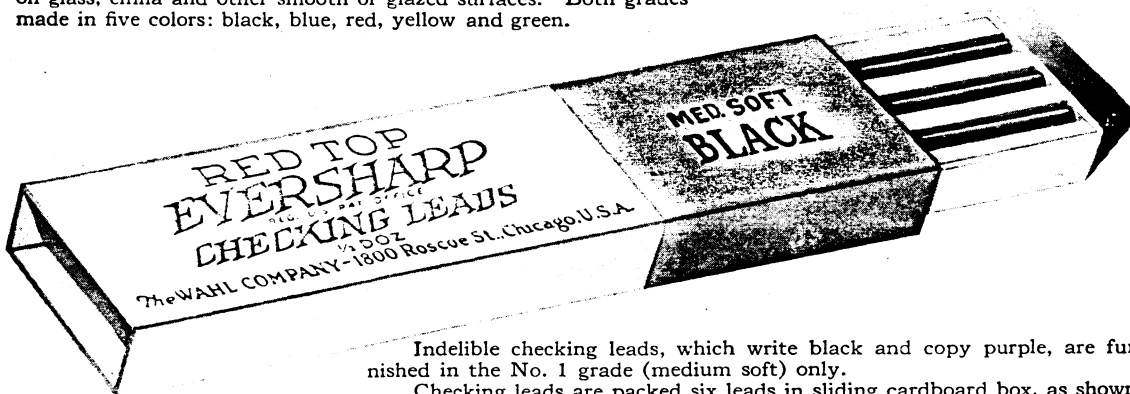

Black (Seven Grades)	2B —Extra soft
	B —Soft
	HB—Medium soft
	F —Firm
	H —Medium hard
	2H —Hard
	4H —Very hard
	Purple Copying
	Red
	Blue
	Green
	Yellow

Eversharp leads are packed in Red Top containers as follows:

- 12 leads in one red-top metal tube (black in oblong tubes; colors in round tubes).
- 12 metal tubes in one cardboard box; 1 gross sticks in all. See illustration at top of page.
- 144 leads in sliding box, for office use (see illustration at left center of page).

EVERSHARP CHECKING LEADS

For use in Eversharp checking and executive pencils listed on page 23. Accurately made of finest materials. Furnished in two grades: No. 1, medium soft, and No. 2, extra soft. The No. 2 grade can be used for writing on glass, china and other smooth or glazed surfaces. Both grades made in five colors: black, blue, red, yellow and green.

Indelible checking leads, which write black and copy purple, are furnished in the No. 1 grade (medium soft) only.

Checking leads are packed six leads in sliding cardboard box, as shown.

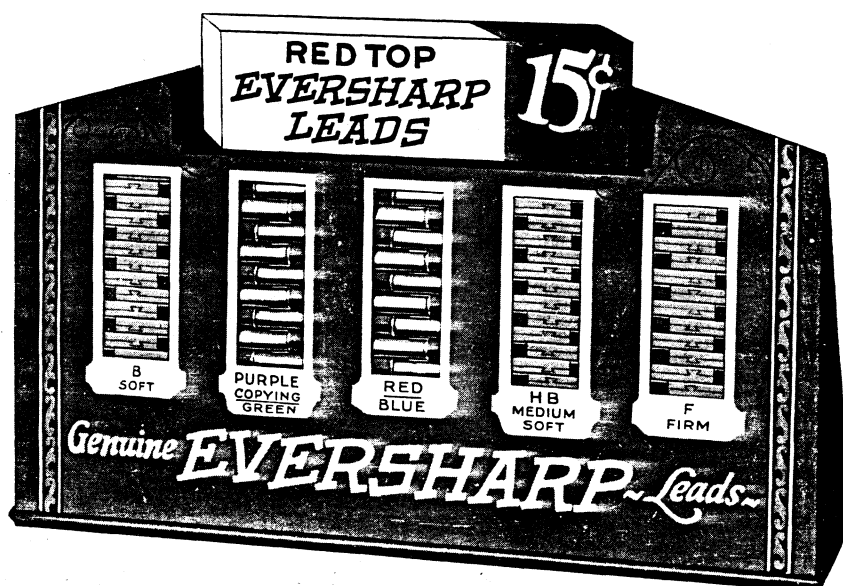

EVERSHARP ERASERS

(Not Illustrated)

Made of fine rubber to fit Eversharp pencils. One box of 12 erasers furnished free with each dozen steel tubes of black Red Top leads of standard (thin) Eversharp diameter. Extra erasers may be ordered separately if desired. When ordering specify whether erasers are wanted for regular, miniature or Commercial Eversharp.

EVERSHARP LEAD COUNTER DISPLAY ASSORTMENTS

The retail sale of Eversharp leads has been materially increased by the use of these handsomely colored metal lead display stands. Every store can use one of these busy silent salesmen. An Eversharp display stand on your counter is a constant reminder to your customers and serves as an invitation to them to reload their Eversharp. These stands are very substantially built and will remain attractive for many years.

Eversharp lead stands are made in two sizes and are furnished only with standard assortments of Eversharp leads as follows:

Telegraph
Word

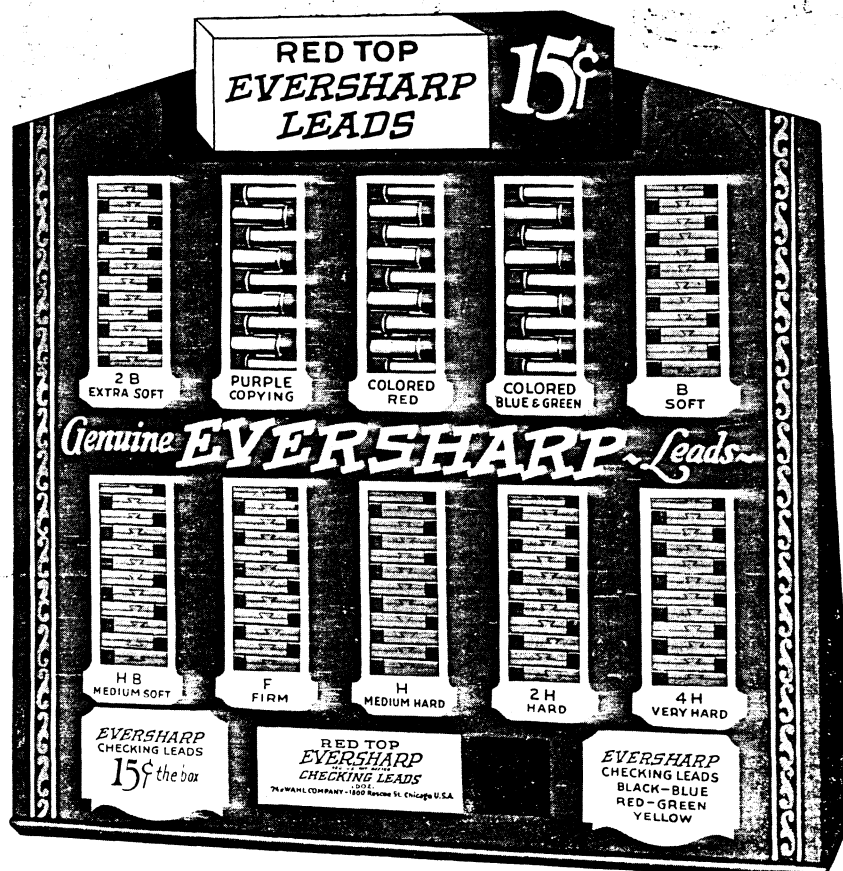

Caesg

LEAD ASSORTMENT No. 9—Small size assortment. Contains one dozen tubes each of grades B, HB and F black Eversharp leads, and $\frac{1}{2}$ dozen tubes each of purple copying, Eversharp red, Eversharp blue and Eversharp green leads. Contains three dozen erasers; no checking leads included. Small size display stand, shown at top of page furnished with this assortment.

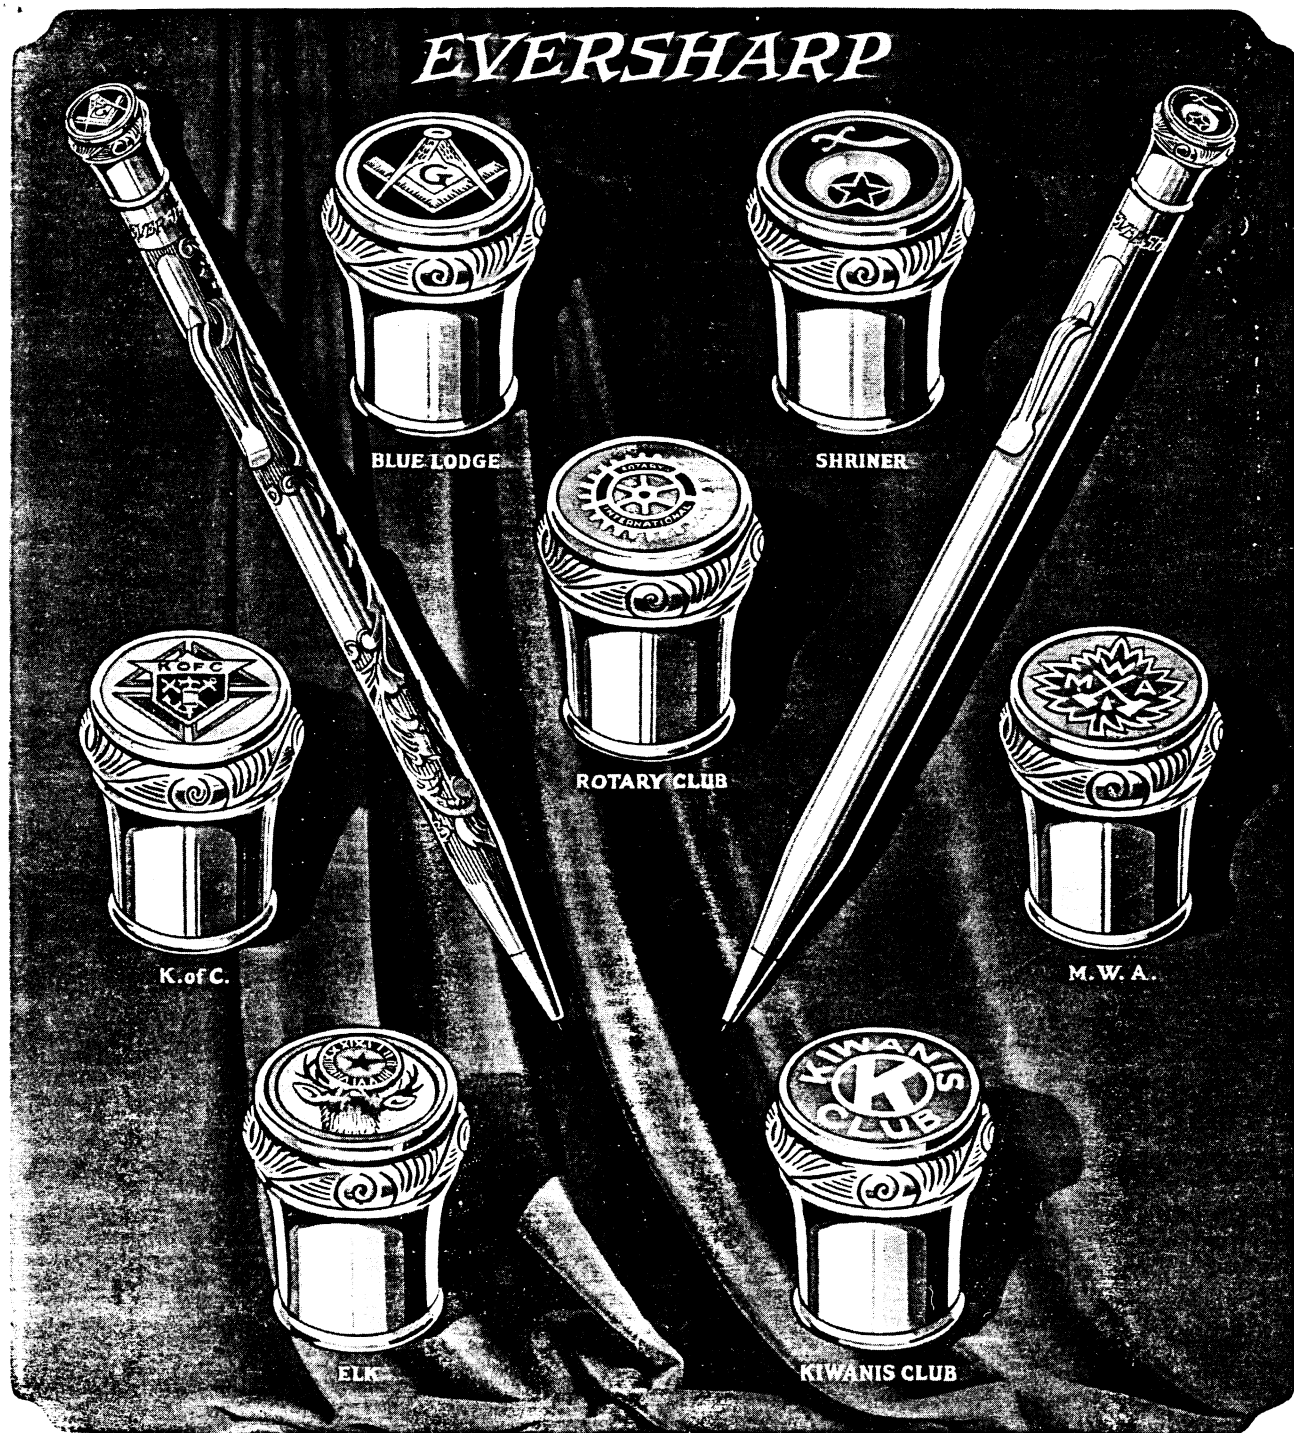

Telegraph
Word

Caepd **LEAD ASSORTMENT No.**

8—Our largest and most complete assortment. Contains 1 dozen tubes of each grade of black leads (of regular size), 1 dozen purple copying, 1 dozen Eversharp red, $\frac{1}{2}$ dozen each Eversharp blue and Eversharp green, six boxes (assorted) checking leads and 7 dozen erasers. Total of $10\frac{1}{2}$ dozen boxes of leads. Large size display stand illustrated at right furnished with this assortment.

EVERSHARP

EVERSHARP WITH ENAMELED EMBLEMS

Orders for silver plated, sterling and gold filled Eversharps bearing emblems of any of the following organizations can be filled from stock:

Blue Lodge
Kiwanis

Rotary
Shriner

Elk
K. of C.

M. W. A.
K. P.

These emblems are beautifully enameled *in full colors* on top of pencil cap.

Quotations on Eversharps with emblems, other than those mentioned above, furnished on request.

The Pen of Today—and Tomorrow

THE Wahl Metal Pen is as far ahead of old-fashioned fountain pens as the New Perfected Wahl Eversharp is ahead of the clutch pencil of grandfather's day.

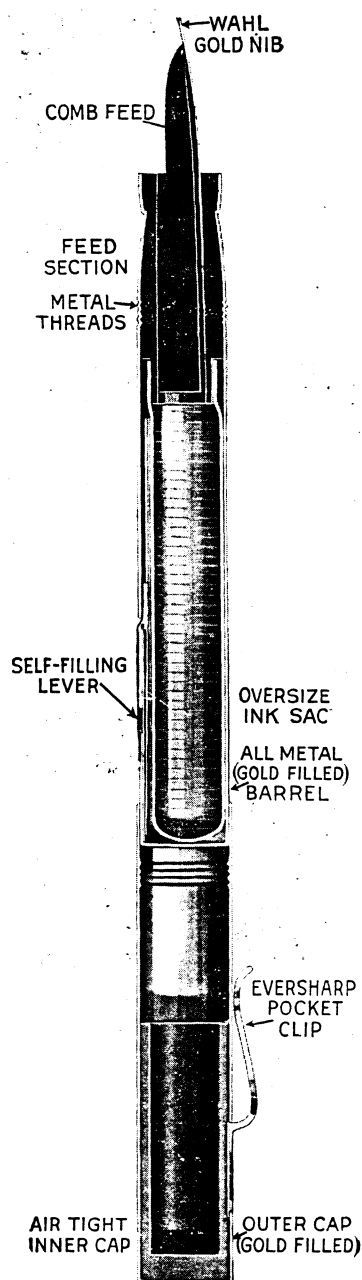

Its barrel is made of gold or silver—age-enduring metals that defy breaking or wearing out. The metal barrel, on account of its thin walls, permits the use of a much larger ink sac than is possible in any rubber-barrel pen of like diameter. This means greatly increased ink capacity and less frequent filling.

Gold and silver are the ideal materials for such an intimate personal object as a fountain pen. A Wahl Metal Pen peeping from pocket or purse is indicative of the good taste and refinement of the user. It is the pen for everyday use and a lifetime of hard, practical service.

Notice the simple, sturdy, sensible construction of the Wahl Pen in the illustration at the right. There are no frills about it—just the substantial materials and solid construction that a really fine writing pen must have.

The many styles and sizes of the Wahl Pen are shown on the following pages. Every Wahl Metal Pen is engine-turned or engraved in a design to match a New Perfected Wahl Eversharp pencil. Every Eversharp owner should have one of these fine pens to match. A matched pen-and-pencil set, made by Wahl, is the finest complete writing outfit that money can buy.

Every Wahl Pen can be furnished in a wide variety of nibs as shown on pages 54 and 55.

Built for Those Who Want the Best

MILLIONS of people prefer a black rubber fountain pen to any other writing instrument. To meet this large, steady demand we have built a complete line of rubber pens of the highest quality.

The following pages show many styles and sizes of black rubber Wahl Pens in chased and engine-turned finishes. So great has been the popular approval of our new engine-turned models that we have had to greatly increase our factory capacity on these fast selling numbers.

Every part of every Wahl Rubber Pen is made by highly skilled workmen from high grade materials. Every pen is subjected to many rigid inspections before it reaches your store.

The Wahl Company has steadfastly refused to sacrifice a single iota of quality on the altar of lower price and longer profit. It is our firm belief that good selling demands honest merchandise, honestly made.

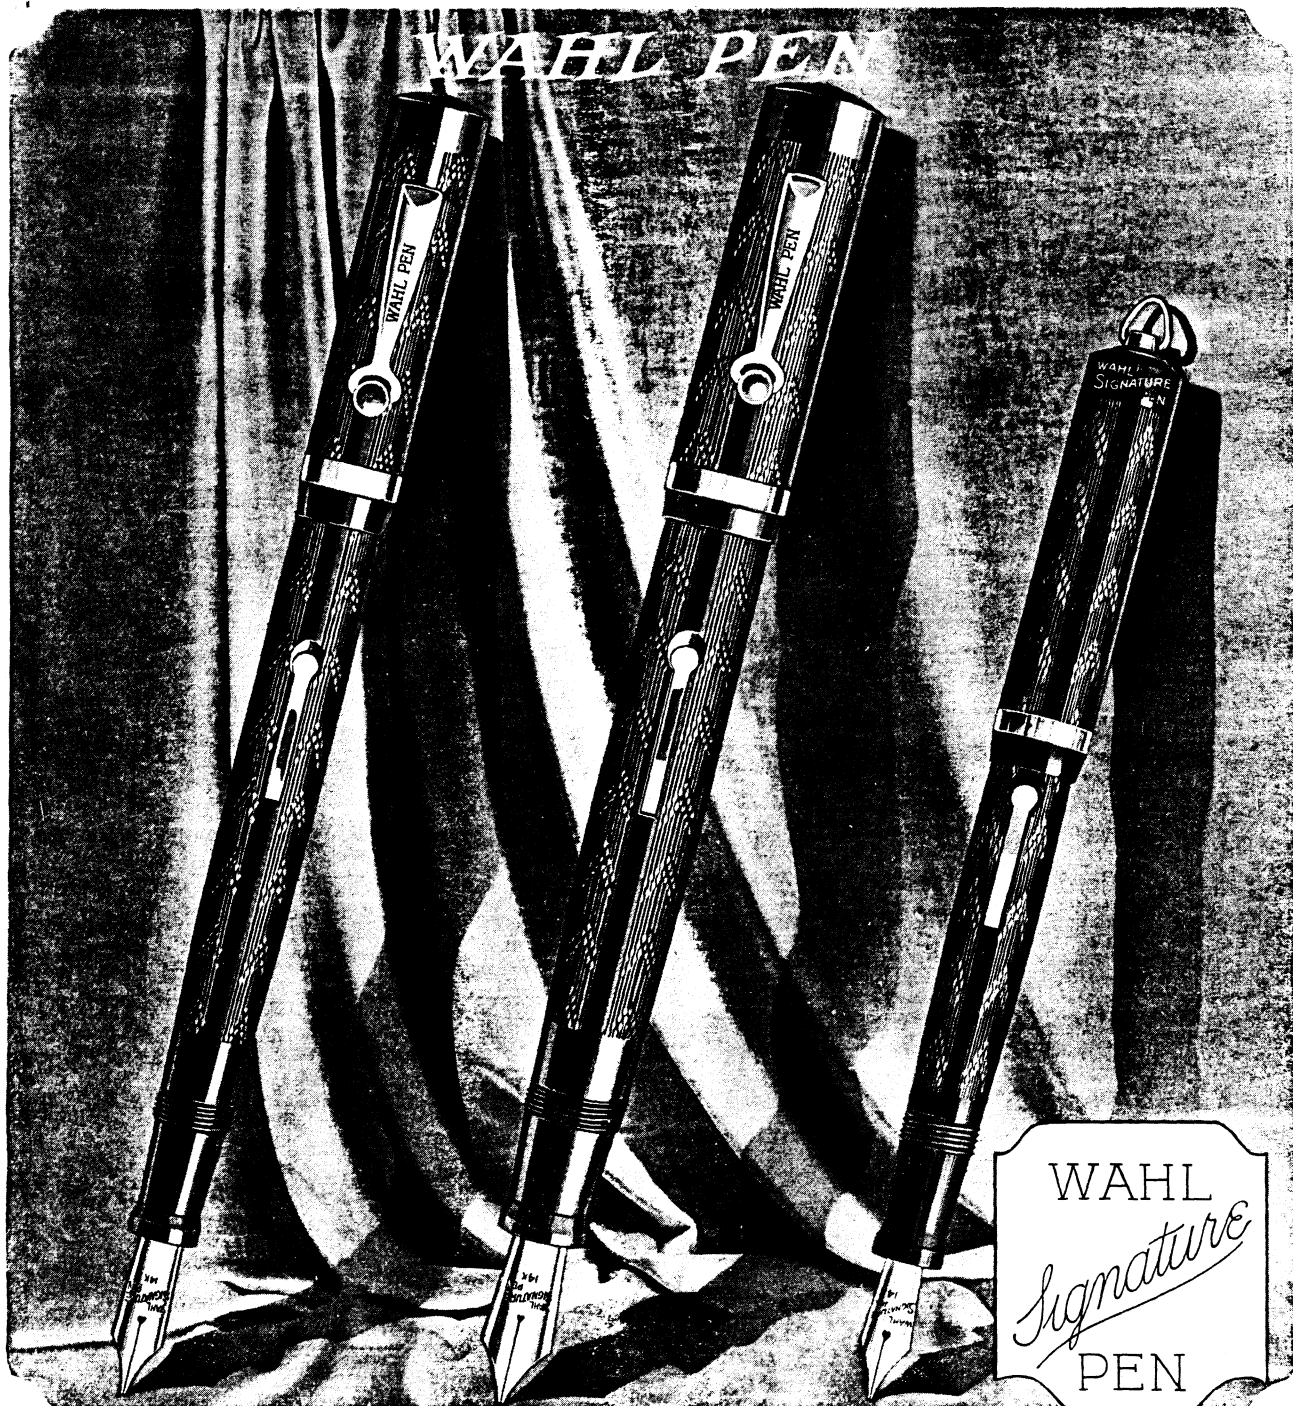

Each Wahl nib is of generous size and weight, and is tipped with the best grade of osmiridium, a metal compound so precious that many manufacturers reserve it for use on only their higher priced pen points. This point is very carefully smoothed and polished, to insure a smooth-gliding writing surface at the writer's every stroke.

The Wahl comb feed, which holds ink as a comb holds water, controls the ink flow at all writing speeds, and insures writing the instant the pen touches the paper. This makes shaking and coaxing the pen unnecessary.

An airtight chamber inside the pen cap prevents leaking or "sweating" as well as keeping the point moist for instant writing.

Wahl Pens, in rubber as well as in metal, can be fitted with any of the wide variety of nibs pictured on pages 54 and 55. This wide choice of nibs, as well as the large assortment of barrel sizes and finishes, makes it possible to fill exactly the individual requirements of every man and woman who writes.

WE believe that the Wahl Signature Pen will please a greater number of fountain pen users than any pen ever placed on the market. Its nib is of a special weight and has a firm point, which is, however, very carefully ground and extremely smooth in its writing qualities. It writes as nearly like a pencil as it is possible for a fountain pen to do. The Signature Pen is made in three sizes—ladies', regular and oversize—all of the same high quality. Engine-turned in the beautiful Dart design—and equipped with gold filled roller clip, filling lever and cap band—the Signature Pen is sure to appeal to those who want a superfine writing instrument. All sizes hold a large quantity of ink.

Fitting a Pen to the User's Hand

GIVING a customer a pen that fits his hand is the most important factor in the sale of a fountain pen. If more time were spent on this feature at the time of sale, at least one-half of so-called fountain pen troubles could be eliminated. Many times a customer will complain of a scratchy nib or of the ink flow being too fast or too slow, when the real trouble is that the pen is not suited to his hand. Fountain pen satisfaction depends in a large measure upon the proper selection of a nib. A purchaser should be offered a fine, medium, coarse, manifold, posting, oblique, stub, half stub, or Signature nib, stiff or flexible, with an even ink flow, according to the writing style of the individual.

Every retail dealer and salesperson should familiarize himself with the nib styles shown on pages 54 and 55 of this catalog. The use of this knowledge will make satisfied customers and create confidence in the dealer and the product purchased. If you do not have in your stock the exact pen wanted, do not substitute, but write us, sending if possible a steel pen that just suits the user, and we will match it with a Wahl Pen nib.

Re-filling a Wahl Pen

Only good, clean bottled fountain pen ink, free from dust, dirt and other foreign matter, should be used to fill a Wahl Pen. Hold pen in perpendicular position (with the point down) and raise the lever on side of barrel. Then completely submerge gold pen point and lower end of point section in ink. While in this position lower lever to its normal position, allowing point and point section to remain submerged in ink for about five seconds in order to allow the rubber sac to draw in a full charge of ink. In the case of a new pen repeat this lever movement to draw in and expel ink several times in order to moisten thoroughly the ink channel in the comb feed. Now, still holding pen with point down, wipe off surplus ink from pen and feed, and pen is ready for use.

Unless the gold pen and end of point section are completely submerged in ink and left in long enough to allow the sac to fill with ink, air bubbles will be drawn into the sac and the pen will be only partly filled. These air bubbles first retard the flow of ink, and afterwards, as the air rushes to the top of the ink sac, they have a tendency to force out the ink and let it flow too rapidly, causing the pen to flood or drop ink. Every salesperson should satisfy himself that each purchaser understands the proper method of filling a Wahl Pen.

Cleaning a Wahl Pen

More pens go to repair stations on account of being dirty or clogged than for any other reason. Every purchaser of a fountain pen should be told the importance of cleaning his pen at regular intervals. To clean a Wahl Pen, repeat the filling operation several times as outlined above, using cold water instead of ink. If pen is clogged use a solution of one part ammonia to three parts water in order to dissolve the dried ink. Then remove dried ink from outside of pen and feed with a soft brush. By filling with and expelling the water or water and ammonia solution several times the feed channel will be cleaned out. Repeat this operation in clean water to get the ammonia solution out of the pen. Then shake pen well in order to expel all the water and pen is ready for filling as directed above. **DO NOT USE HOT WATER**, as hot water softens the hard rubber parts.

The inside of the cap should be cleaned frequently with a piece of soft cloth or tissue paper and the airholes in side of cap should be cleaned with an ordinary pin.

If pen is very badly clogged with dried ink or poor ink and cannot be thoroughly cleaned by the process outlined above, it should be placed in the hands of a competent fountain pen repair man at a regular pen service station.

MINIATURE PENS

(Engine Turned. Self-filling Style)

These miniature Wahl Pens are thoroughly practical writing instruments in every respect and due to their metal construction hold a very large amount of ink for their size. Each pen will write approximately 1,200 words with one filling of ink.

WAHL PEN NIBS

On these two pages are shown the 59 styles and sizes of Wahl 14K gold nibs. Among these is a nib to suit every hand. Wahl Pen nibs are generous in size and gold content and are heavily tipped with the finest grade of hard osmiridium obtainable. Each nib is carefully pointed, ground and smoothed by highly skilled craftsmen. We fully believe them to be in every respect the finest nibs manufactured. The uses for each of the Wahl Pen nib styles are given below. A careful study of these two pages will enable you to give expert advice to your customers in the selection of nibs to meet all individual writing needs.

Fine—Long fine points are used for light writing, where small lines are desired. They are in general use among ladies and girls and are used by many men who write with a light stroke. They are also good for fine penmanship where shading is desired. Made in sizes 2 to 6, inclusive.

Medium—Used for all ordinary writing purposes. This is the most popular nib on the market and is suited to a large number of men, women and children. It writes a medium sized line and is sometimes used where shading is desired. Made in sizes 2 to 6, inclusive.

Coarse—Used where the writer wishes a heavy line on both direct and cross strokes. Good for heavy shading. Made in sizes 2 to 6, inclusive.

Stub—Used by persons desiring a short nib that makes a heavy line on the down stroke and a light line on the up stroke. Used also by back-hand writers and sometimes for hand lettering where bold characters are desired. Made in sizes 2 to 6, inclusive.

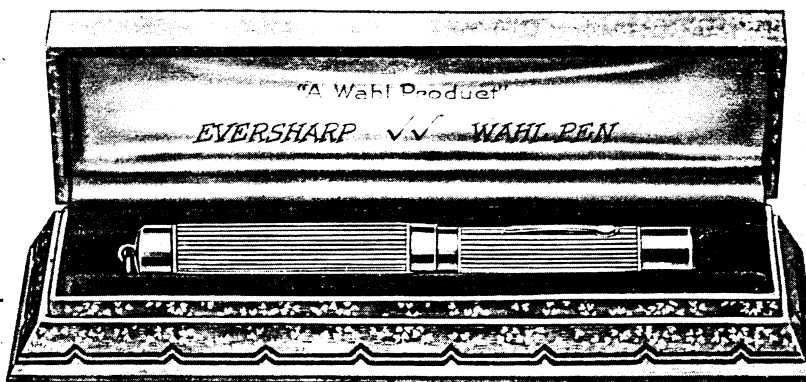

Half Stub—Practically the same as the stub with the exception that the point is not so wide. Made in sizes 2 to 6, inclusive.

How Wahl Pens are Packed

Each black rubber Wahl Pen (except the Signature models shown on page 41) and each metal-barrel pen of Check design only (page 37) is packed in one of the neat white cardboard boxes shown below.

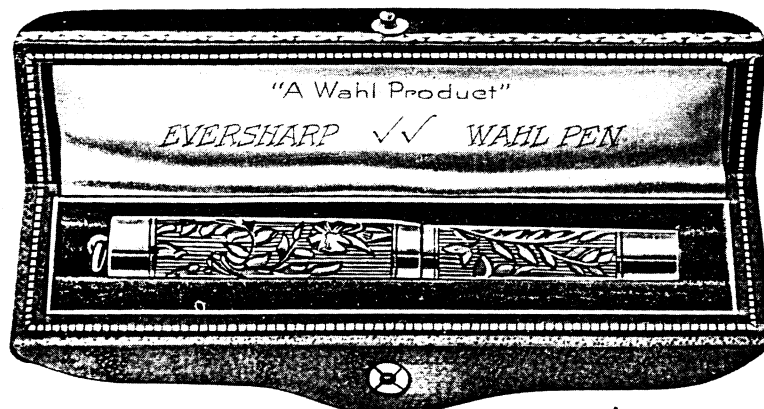

Wahl Signature Pens are packed in attractive buff-colored cardboard boxes similar in design to the one shown above.

Engine-turned metal-barrel pens and sterling silver hand engraved pens are packed in handsome satin-and-velvet lined gift boxes as shown above. There are three sizes of gift boxes of this type: Men's, ladies' and miniature. They are all exceptionally neat and attractive.

Solid gold Wahl Pens are packed in beautiful, genuine leather cases, lined with satin and velvet. See illustration at the right. These cases are rich in appearance and in perfect harmony with the pen.

Oblique—Very similar to a stub, but is beveled off at the side of the point to suit a person who holds the penholder between the fingers instead of between the thumb and index finger. A right-handed person uses a right oblique, and a left-handed person uses a left oblique. When ordering specify which is wanted, as the right oblique is always sent unless otherwise specified. Made in sizes 2 to 6, inclusive.

Falcon—Very much like a fine, medium or coarse long nib, only is a trifle more flexible on account of being cut out on the sides. Made in fine, medium and coarse, in sizes 4, 5 and 6 only.

Stenographer—A long fine flexible nib intended to give perfect satisfaction in making characters used by stenographers. Made in sizes 2, 3 and 4 only.

Bookkeeper—A long and fairly stiff nib made of heavy stock to enable the writer to make small clear-cut figures. Made in sizes 2, 3 and 4 only.

Manifold—A short stiff nib about the size of a medium point. A favorite among salesmen and people who make carbon copies. It is also good for general writing purposes. Writes on rough or cheap paper and will stand very hard usage. The point for people with a heavy hand. Made in sizes 2 to 6, inclusive.

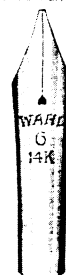

Posting—A short stiff nib with a fine point, suitable for ledgermen, bookkeepers and accountants. Adapted for fine figure work on books. Made in sizes 2 to 6, inclusive.

Waverly—This nib is sometimes called the "turn up" or "Ballpoint" nib. Made with a medium size point only. It is a smooth writing pen at all angles. Writes well on rough paper. A favorite among nervous or old people. Made in size 4 only.

Signature—Designed for those who like a heavy, durable nib but one not so hard and stiff as to make writing tiresome. Has a large ball point—very smooth and easy writing. Good for use by either a heavy or light hand on any kind of paper. Will stand lots of hard work. Made in fine and medium points, sizes 2, 4 and 6 only.

Solid Gold Wahl Combination Writing Sets

For those desiring to present a gift of extraordinary elegance, we suggest a solid gold Wahl writing set, consisting of a solid gold Eversharp and a solid gold Wahl Pen to match.

These sets are encased in beautiful, genuine leather gift boxes, lined with satin and velvet of very high grade. These writing set boxes are beyond compare for richness of appearance. The man's set shown at the top of this page in the full-sized gift box is composed of Eversharp No. 66 and Wahl Pen No. 434E.

At the center of the page is given a view of a Wahl leather gift box when closed. This is indeed a distinctive

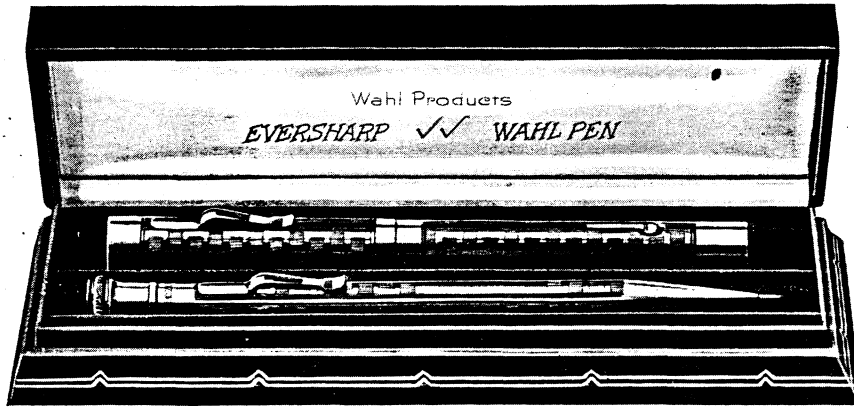

and dignified case. Ladies' size and miniature size solid gold combination sets are encased in leather boxes of similar construction, but smaller in size, to fit the size of the products. The set at the bottom of the page comprises Eversharp No. 91SW and Wahl Pen No. 328BW.

A solid gold Wahl writing set is ideal for an individual or group gift. A wide selection is offered by this catalog.

The Popular Wahl Combination Writing Sets

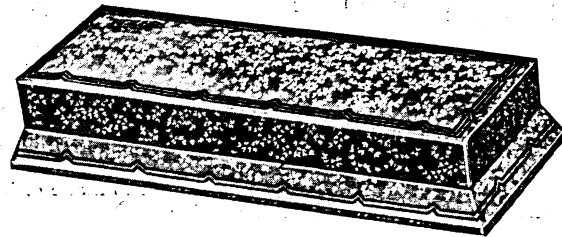

Wahl writing sets, composed of an Eversharp pencil and an All-Metal-Barrel Wahl Pen, priced at \$6.50 and up, are packed and shipped in one of the fancy gift boxes shown

on this and the following page. Sets composed of rubber pen and pencil with gold-filled trimmings, come in a special white combination box.

No gift is more appropriate and useful than one of these beautiful writing sets engraved with initials, name or monogram.

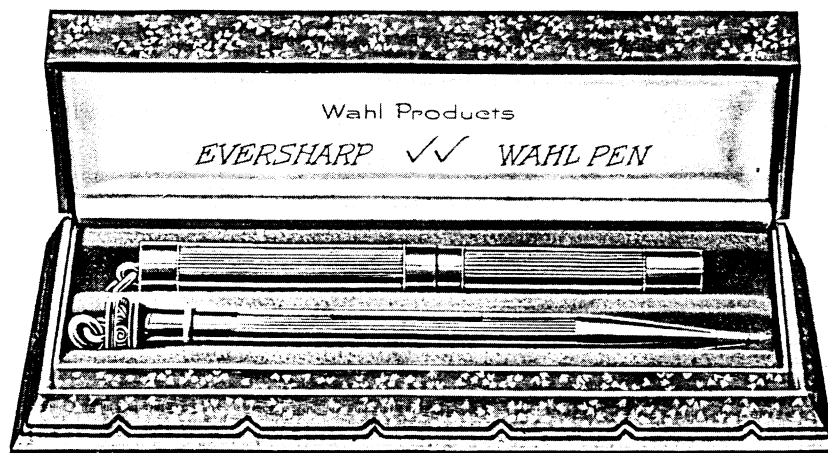

Men's sets (except solid gold) come in one of the satin-and-velvet lined gift boxes shown at the top of this page. The set in the picture comprises Eversharp No. 14 and Wahl Pen No. 656A.

Ladies' sets (except solid gold) come in daintily colored satin-and-velvet lined boxes similar to the one shown at the bottom of this page (set shown comprises Eversharp No. 10SW and Wahl Pen No. 323AW). Illustration at center of page shows ladies' size gift box closed.

Miniature sets come in boxes similar in style to those used for ladies' sets, only smaller in size.

An almost limitless selection of combination sets may be made from the wide variety of pen and pencil styles shown in this book.

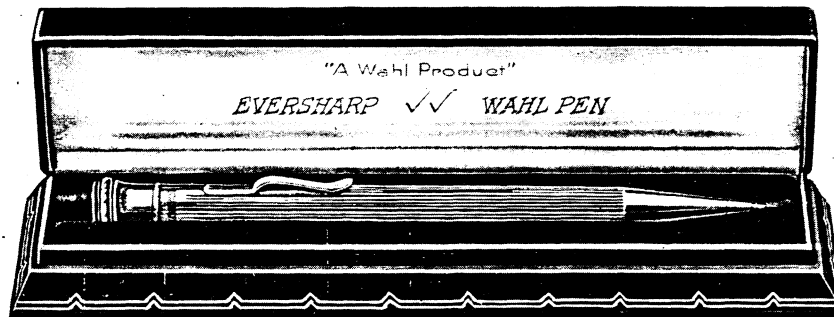

How Eversharps are Packed

All pencils listing from \$1.00 to \$3.50 are packed one pencil in a white set-up box (see illustration above) or in a white folding box of similar appearance.

Pencils listing at \$4.00 up (except miniatures and solid gold) are packed in satin - and - velvet gift boxes as shown at right.

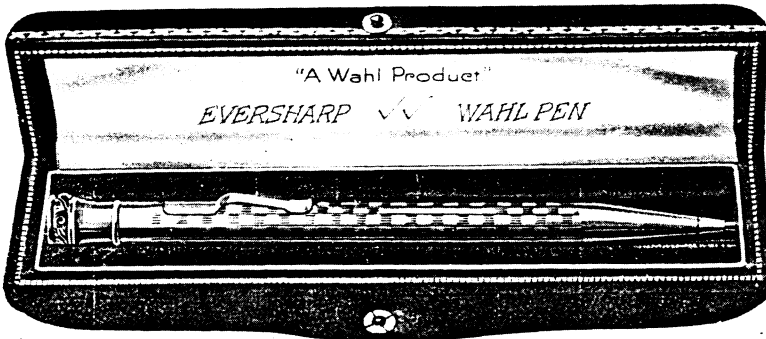

All enameled and bakelite numbers (see page 22) are packed one dozen (of one color) on a very attractive counter display card. Dozens will not be broken.

Gold filled match-thin pencils No. 2 come in special individual gift boxes. Silver plated match-thin pencil No. 1 will be supplied either one dozen or two dozen on a display card, or can be shipped loose (unboxed) in any quantity.

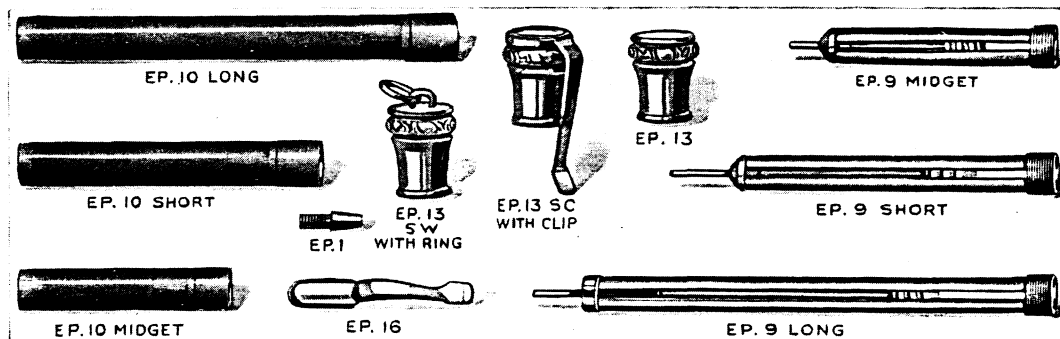

Checking and executive pencils (page 23) are packed in neat individual brown cardboard boxes.

Miniature and midget miniature numbers (except solid gold) come in small neat individual boxes.

Solid gold Ever-sharps are packed in genuine leather gift boxes of appropriate size. See illustration at the left of this page.

Parts Price List For Old Model Eversharps

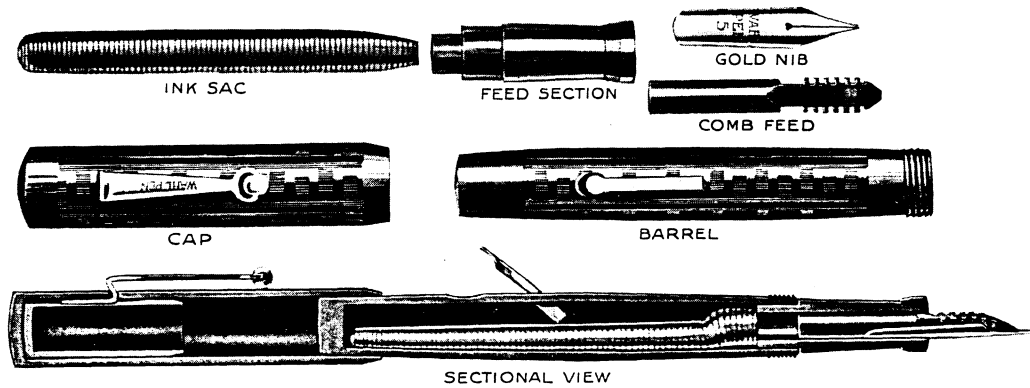

The illustration shows the principal renewal parts of the old model Eversharp pencil. The simplicity of the New Perfected Eversharp has reduced the need for replacement parts to a minimum. All operating mechanism of the new Eversharp is interchangeable and should a renewal of any working part be needed, it can be taken from a pencil in stock. The replaced part may then be returned to us and we will send a new one without charge.
